

4 Estimates

The scope is deliberately narrow: articles with a text layer, converted for reading by a language model. Within that scope the results are stable across the publishers we tried. Outside it, users should expect to check the output before trusting it. A second reviewer asked for timings; conversion runs at a few pages per second on a laptop.

The effect of density is 20.10 and that of income is 20.09 with $p < .05$ in 2 of the 3 models.

Variable	(1)	(2)	(3)
Population density	20.10	20.09	20.11
Income per capita	0.55	0.49	20.50
Housing starts	26.65	2.10	22.46
